Allowable Subject Matter

1. Claims 1-15 are allowed.

Claim 1 is allowable. The reason for allowance is that the prior art of record fails to disclose or reasonably suggest a portable multi-function charger, comprising: a body having a cavity therein; a circuit section arranged in the cavity and having a circuit board with a plurality of spring contacts; at least one input, an output socket, and an output cord each connected to the circuit board for detachably coupling a portable device to the circuit section. It is these features found in the claim, as they are claimed in the combination, which has not been found taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-9 are allowed due to their dependency on claim 1.

Claim 10 is allowable. The reason for allowance is that the prior art of record fails to disclose or reasonably suggest an input end and an output cord connected to the circuit board for detachably coupling a portable device to the circuit section, the input end being connected to a plug, the plug being connected to a connector through an input cord; and a mounting stage connected to the body and the spring contacts extending into the mounting stage. wherein the output cord and the plurality of spring contacts provide for simultaneous charging of a plurality of portable devices. It is these features found in the claim, as they are claimed in the combination, which has not been found taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claim 11 is allowed due to its dependency on claim 10.

Claim 12 is allowable. The reason for allowance is that the prior art of record fails to disclose or reasonably suggest an input end and an output cord connected to the circuit board for detachably coupling a portable device to the circuit section; and a mounting stage connected to the body and the spring contacts extending into the mounting stage, wherein the output cord and the plurality of spring contacts provide for simultaneous charging of a plurality of portable devices. It is these features found in the claim, as they are claimed in the combination, which has not been found taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 13 and 15 are allowed due to their dependency on claim 12.

Claim 14 is allowable. The reason for allowance is that the prior art of record fails to disclose or reasonably suggest the mounting chamber has two connection tabs on both sides thereof and each of the connection tabs has a clamping section therein, the body has at least one clamping tooth on both sides thereof and resiliently engaged with the clamping section such that the mounting chamber is adjustably arranged on the body. It is these features found in the claim, as they are claimed in the combination, which has not been found taught or suggested by the prior art of record, which makes this claim allowable over the prior art.
